

# BANYAN STAT KIT® 900

Stat Kit is shown with optional ACLS package

The Banyan **Stat Kit 900** (Item #900) is the most extensively equipped Banyan Stat Kit. In addition to the multitude of drugs, the Stat Kit 900 contains emergency oxygen, and Ambu disposable resuscitator, and a manual suction unit. You have the drugs, oxygen, and equipment to start treatment on virtually any life-threatening emergency associated with an office based practice.

Although larger than the Stat Kit 700, the Stat Kit 900 is portable at 28 pounds. With our newly redesigned foam tray protection, all drug contents are cushioned snugly in place. If you are a current Stat Kit owner, you might want to consider upgrading your existing Stat Kit to include the new foam tray and all standard components. You might also want to consider the **optional ACLS drug package** (Item #7100). This package contains two vials each of Amiodarone and Vasopressin.

The oxygen system has a preset flow rate for speed of setup and administration. It is preset to deliver a minimum of 8LPM for approximately 30 minutes. The medical "C" spun aluminum cylinder is easily refilled at oxygen supply houses.

The Ambu SPUR disposable resuscitator is one of the most popular selling disposable manual resuscitators. There is no sterilization and no difficulty in assembly or loss of components. It connects easily to the oxygen system.

The manual suction unit included in the Stat Kit 900 is compact, with a reusable pump handle. The disposable container and catheter traps more than 200ml, quickly suctioning fluids from the nose and mouth. The disposable container is easily sealed and discarded.

**Dimensions:** 6 3/8" x 23" x 27"  
**Weight:** 28 lbs.

# BANYAN STAT KIT® 700

The Banyan **Stat Kit 700** (Item #700) is your best choice if you already have oxygen, resuscitation and suction equipment in your office. You have a multitude of drugs, plus the equipment to start treatment on virtually any emergency associated with a medical practice. The newly redesigned foam tray found in the 700 helps keep the kit organized, with all drug contents cushioned snugly in place. If you are a current Stat Kit owner, you might want to consider upgrading your existing Stat Kit to include the new foam tray and all standard components (Item #7200).

In addition to the Stat Kit 700 and the upgrade package, we also offer an **optional ACLS drug package** (Item #7100). This package contains two vials each of Amiodarone and Vasopressin.

**Dimensions:** 6 1/8" x 17 1/4" x 19 7/8"  
**Weight:** 16 lbs.
