

Budget Pleasing... Space Saving

Captus[®] 600 Thyroid Uptake Table Top System

When there is not enough space for a full mobile system, consider the CAPTUS 600 Table Top System to meet your thyroid and well counting needs. This economical microprocessor-based system is small in size, but big on value with features such as full spectrum viewability on screen while counting.

The CAPTUS 600 Table Top System contains all of the outstanding features of the mobile system in a sturdy compact table top stand.

Replace that old system with an economical system that easily does thyroid uptakes, bio-assay, schilling, blood volume (I-125 and/or Cr-51), wipe test and a 512 channel MCA.

FEATURES

- Same outstanding features of the CAPTUS 600 System
- Small foot-print saves space
- Easy-to-position collimator when patient is seated
- Menu-driven program guides you quickly through all sections
