

Ecolotion Transmission Lotion

- Salt, Alcohol & Perfume Free
- Conductive & Non-Corrosive
- Twist cap for accurate dispensing
- Dispenser bottle included with 5L
- Flip-top cap for quick refilling
- Competitively priced
- Recyclable packaging
- Registered with both HPB & FDA
- Available with Aloe Vera
- Available Scented or Unscented

EcoLotion Transmission Lotion is a great alternative to ultrasound gels! EcoLotion Transmission Lotion is an excellent conductive medium for use in therapeutic ultrasound as well as other external procedures when a lotion is preferred to a gel. Unlike gels, EcoLotion can simply be rubbed into the patient's skin after treatment. Technicians appreciate the reduced clean-up time and minimized patient discomfort while patients enjoy the rich texture and pleasant smell.

EcoGel 100 Imaging Ultrasound Gel

- Salt, Alcohol & Perfume Free
- Conductive & Non-Corrosive
- Twist cap for accurate dispensing
- Does not contain Propylene Glycol
- Flip-top cap for quick refilling
- Approved by equipment manufactures
- competitively priced
- Recyclable packaging
- Registered with both HPB & FDA

EcoGel 100 Imaging Ultrasound Gel is a low viscosity ultrasound gel (35,000–45,000 cps) formulated primarily for use in diagnostic imaging and other external procedures requiring a thinner medium. While EcoGel 100 Imaging Ultrasound Gel shares similar conductive properties as some of our thicker gels, this less viscous gel assists in producing a clearer image by spreading thinner and minimizing trapped air bubbles. Perfect for technicians who prefer a thinner gel!

EcoGel 200 Multipurpose Ultrasound Gel

- Salt, Alcohol & Perfume Free
- Conductive & Non-Corrosive
- Does not contain Propylene Glycol
- Twist cap for accurate dispensing
- Dispenser bottle included with 5L
- Flip-top cap for quick refilling
- Approved equipment manufactures
- Available in 'Blue' or 'Clear' formula
- Competitively priced
- Recyclable packaging
- Registered with both HPB & FDA

EcoGel 200 Multi-Purpose Ultrasound Gel is our most popular brand of ultrasound gel. It is a medium viscosity gel (80,000–100,000 cps) designed for use in therapeutic ultrasound, diagnostic imaging and other external procedures requiring a viscous yet easy-to-use conductive medium. Practitioners appreciate the versatility of EcoGel 200 as well as the many convenient packaging features designed to increase productivity, minimize patient discomfort and decrease product waste.

EcoGel 300 Tens Gel

- Salt, Alcohol & Perfume Free
- Conductive & Non-Corrosive
- Does not contain Propylene Glycol
- Twist cap for accurate dispensing
- Dispenser bottle included with 5L
- Flip-top cap for quick refilling
- Registered with both HPB & FDA
- Competitively priced
- Recyclable packaging

EcoGel 300 TENS Gel is a sticky, high viscosity conductive gel (110,000–120,000 cps) designed primarily for TENS treatment and other external procedures requiring a thicker medium. EcoGel 300 TENS Gel can also be used in therapeutic ultrasound as it shares the same conductive properties of our less viscous gels. Due to the thickness of EcoGel 300 TENS Gel, it is an ideal medium for prolonged external treatment.
