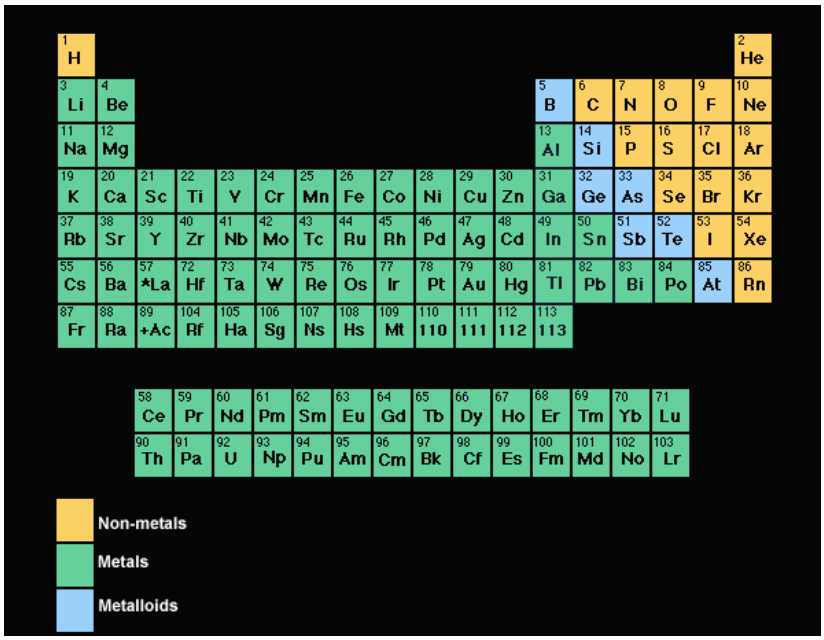
“Sponsor an Element”

Medi-Nuclear Corp. has donated to the “Sponsor an Element” program at the National Atomic Museum (soon to be renamed National Museum of Nuclear Science & History) in Albuquerque, New Mexico.

The program “Sponsor an Element” is a permanent recognition opportunity inside the main lobby of the new museum. It is a periodic table made of etched granite pieces that are slightly color coded to depict the component classes of the table. Each sponsor will have their name and dedication engraved on the tile.


Look for MNC on the Cobalt tile!
